

## What is Independence Transportation For All?

The purpose of the plan is to develop a citywide multimodal transportation network. This includes sidewalks, bikeways, mobility hubs, and transit routes to make multimodal transportation safe, convenient, and connected. The plan aims to connect various recent neighborhood and corridor planning projects to create a citywide framework.

## Why is the plan important?

While transportation infrastructure is well-developed for people driving cars, significant barriers exist for those traveling by walking, biking, or by transit. The City of Independence seeks to improve transportation access and connectivity for all modes of transportation.

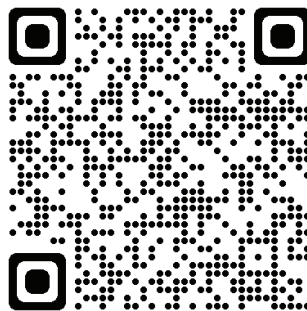

## When will the plan be complete?

The planning process began in June 2023 and will be complete by May 2024. The timeline for implementation will depend on the recommendations selected and the resources and funding available.

## How will your input be used for the plan?

Community input has provided guidance throughout the planning process, including from multiple pop-up public meetings, a community survey, and a mobility workshop. Input provided at this stage will help form and prioritize the recommendations and action steps included in the plan.
